Enhance Your Reiki Intuition, Energy Sensitivity and Mindfulness

...or how the use of hypnotic techniques and trance states with Reiki can do quite amazing things for people.

Through experimentation - and I would like to thank the hundred or so Reiki people who volunteered to be my guinea pigs when I trialled my first three "[Reiki Hypno meditations](#)" - I discovered that using a combination of a Reiki-style meditation with gentle suggestion patterns had a tremendous effect on people in just a few weeks of listening to a 10 minute audio track most days.

As well as being a Reiki teacher I am also a qualified Cognitive Hypnotherapist and NLP Master Practitioner. I trained at Regent's College in London with the internationally respected [Quest Institute](#) and a lot of the course involved perfecting the art of making hypnotic suggestions, a series of elegant and subtle suggestion patterns that can help guide people's subconscious minds so that a person lets go of whatever is holding them back in their life, and enhances their potential.

To begin with I focused on what I think are quite common challenges for people starting out with Reiki:

- Calming your mind so that you can be in more of a mindful state
- Developing your intuitive side
- Enhancing your sensitivity to the energy

This is what some of my students said after listening to the [Reiki Hypno meditations](#) for a few weeks...

"The constant activity in my mind feels to have calmed down. I still have random thoughts, but I now have the ability to let them pass, without grabbing hold of them and picking the bones clean."

Anne MacKenzie

"Certainly, without any question, the MP3 has been a huge benefit to me. I have often wanted to learn meditation but never found the medium or created the opportunity. Your track has changed things to such an extent I would like to learn more and develop my meditation skills."

Jim Furze

"I just seem to be able to get on with life without so much worry. I don't think i realised how very different i have been feeling and how much calmer not just i am but my family and my life is until i sat down to write this."

Jo Cole

"I have often felt no sensitivity to the energy but found that this changed quickly once i started listening to the MP3. I have become much more aware of heat and energy in my hands when using the MP3 and giving treatments. I have been very pleased with the results."

Pauline

"In all I'm delighted with the results. The trial has helped me more than I believed imaginable. My confidence has grown immensely and I'm raring to take my second degree and start working as a practitioner."

Wanda

"My Reiki sessions have definitely altered for the better. I do tend to be more flexible in my approach... I am being 'drawn' to lay my hands on areas that I might not have been before.....and it is certainly a whole lot easier and less structured than before. I have 'let go' of all my former expectations of how the Reiki session ought to proceed...and the results are quite eye opening at times. It is as if I have been 'attuned' to Reiki in a new wayall over again. I can't quite explain it really!"

Carol Leslie

And this quite astounded me, actually. I was sure that [the meditations](#) would work, but I didn't realise how well they would work and how quickly!
